This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. WHAT THE MILLS BILL IS.

A COMPLETE SHOWING OF THE REDUCTIONS PROPOSED IN THE BURDENS OF TAXATION.

Free Raw Materials for the Benefit of Workingmen and Manufacturers, with full Protection on Goods Made in this Country.

The free list of the present tariff includes 325 paragraphs of the law of 1883. In the Mills Bill 139 additional paragraphs are devoted to the free list, including only a very few more than this number of articles. The carrying, therefore, of these articles to the free list is simply an enlargement of the same, and not a making of it anew.

It has been the policy of the country in constructing tariff laws, even those carrying the highest rate of duty, to include in the free list a large number of articles, the importation of which is small, and the necessaries of life produced in other countries and not in this. This same principle has been carried into the present bill, with the addition that certain raw materials which are the foundations of our largest industries have been added to the free list. The section given below representsall the additions made under the present bill:

The following tables show in the first column the amount of tariff-tax paid on each $100 worth of imported goods in 1887. The second column shows the amount to be paid under the Mills bill. Where no rate is given there were no importations last year on which to calculate.

ARTICLES IN WHICH NO CHANGE IS MADE.

The preceding list is the result of a careful computation, not only of existing rates from importations made during the last fiscal year for which full reports have been compiled, but an equally careful one as to the probable effect upon importations under the rates proposed.

The following list is given in order that there may be no excuse for misapprehension on the part of anybody as to those articles, the duty on which remains unchanged under the present law. This list has been prepared with equal care and shows that the rates on a large number of articles are not changed under the proposed bill.
